## GEMS OLYMPIA UCITS FUND - Fixed Income Flexible Strategy

### Characteristics

<b>Structure</b>	UCITS sub-fund
<b>Fund type</b>	Fonds commun de placement (FCP)
<b>Classification</b>	International bonds and other debt securities
<b>Recommended investment horizon</b>	36 months
<b>Benchmark</b>	None

#### Investment objectives of the sub-fund

To achieve long-term capital appreciation by exposing up to 100% of its assets to the global fixed income securities markets, through direct investments, Exchange Traded Funds, Collective Investment Schemes, and financial derivative instruments (including swaps). To pursue its investment objective, the sub-Fund relies on a proprietary investment methodology applied to the global fixed income securities markets.

## GEMS OLYMPIA UCITS FUND - Fixed Income Flexible Strategy

### Risk profile\*

Synthetic risk & reward indicator	Lower risk			Higher risk			
	1	2	3	4	5	6	7
		2					

This indicator represents the risk profile displayed in the PRIIPs Key Information Document. The synthetic risk indicator (SRI) makes it possible to assess the level of risk compared to other funds.

The synthetic risk indicator assumes that you keep the Sub-Fund for the entire recommended minimum investment period of 3 years. You cannot perceive a return on investment in advance. You may not be able to sell your Sub-Fund easily or you may have to sell at a price which could significantly impact your return on investment.

The historical data used for the calculation of this indicator may not constitute a reliable indication of the future risk profile of the Sub-Fund. The risk category associated with the Sub-Fund is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Sub-Fund is currently **ranked at 2** of the indicator given its dominant exposure to the bond and money markets. Among the major risks identified by the European texts, the Sub-Fund may be exposed to the following risks, which are not adequately captured by the risk indicator: **credit risk, counterparty risk and liquidity risk**.

The SRI does not take into account the tax treatment of the Sub-Fund according to the wealth and tax situation of the targeted retail investor. You may not be able to sell it easily or you may have to sell it at a price that will significantly affect the amount you will receive in return. The Sub-Fund does not include any return or capital guarantee against the vagaries of the market. You could lose all or part of the capital invested.

\* Please refer to the Prospectus of the Sub-Fund for the details of the risks associated to this Sub-Fund.

### The Management Company

Olympia Capital Management SA ("OCM") is a French investment management firm, authorized and regulated by the AMF and based in Paris. Founded in 1989, OCM is specialized in asset management and offers a full range of funds, customized solutions and advisory services to institutional and private investors.

# MONTHLY REPORTING as of February 28, 2023

## GEMS OLYMPIA UCITS FUND - Fixed Income Flexible Strategy

---

### Monthly investment commentary

---

The Fixed Income Flexible Strategy ("FIS") sub-fund of the Gems Olympia UCITS Fund was down 1,82% in February 2023.

Strong economic data and higher-than-expected consumer price index (CPI), led to a move higher in bond yields and a decline in equity and fixed-income markets. The data challenged investors' hope for a less restrictive monetary policy in the near term. The Federal Reserve (the Fed), European Central Bank (ECB) and Bank of England, announced rate hikes in February, in line with expectations. The main message from the Fed was that inflation remains too high and the central banks' job is not done yet.

The US 10-year yield moved up from 3.5% to 3.92% during the month. The iShares Core U.S. Aggregate Bond ETF (AGG) was down 2.67% in February. US high yield (HY) bonds were down 1.6%. Emerging markets bonds (EM) were down 2.7%. Preferred bonds were down 0.9%, and US convertible bonds were down 1.6%.

FIS will enter March invested in preferred bonds US treasuries and money market funds, maintaining a low portfolio duration.
