GEMS OLYMPIA UCITS FUND - Fixed Income Flexible Strategy

Characteristics

| | |
|---------------------------------------|---|
| Structure | UCITS sub-fund |
| Fund type | Fonds commun de placement (FCP) |
| Classification | International bonds and other debt securities |
| Recommended investment horizon | 36 months |
| Benchmark | None |

Investment objectives of the sub-fund

To achieve long-term capital appreciation by exposing up to 100% of its assets to the global fixed income securities markets, through direct investments, Exchange Traded Funds, Collective Investment Schemes, and financial derivative instruments (including swaps). To pursue its investment objective, the sub-Fund relies on a proprietary investment methodology applied to the global fixed income securities markets.

GEMS OLYMPIA UCITS FUND - Fixed Income Flexible Strategy

Risk profile*

| Synthetic risk & reward indicator | Lower risk | | | Higher risk | | | |
|-----------------------------------|------------|---|---|-------------|---|---|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |

The risk indicator assumes you keep the Sub-Fund for the recommended minimum investment period of 3 years. The actual risk can vary significantly if you cashing-in at early stage and you may get back less.

You may not be able to sell your Sub-Fund easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this Sub-Fund compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The historical data used for the calculation of this indicator may not constitute a reliable indication of the future risk profile of the Sub-Fund. The risk category associated with the Sub-Fund is not guaranteed and may change over time. The lowest category does not mean "risk free".

We have classified this product as [2] out of 7, which is a low risk class, due to its exposure to a diversified portfolio of UCIs and managed accounts. This rates the potential losses from future performance at a very low level, and it is very unlikely that poor market conditions could impact our capacity to pay you.

Among the major risks identified by the European texts, the Sub-Fund may be exposed to the following risks, which are not adequately captured by the risk indicator: credit risk, counterparty risk and liquidity risk.

The SRI does not take into account the tax treatment of the Sub-Fund according to the wealth and tax situation of the targeted retail investor. You may not be able to sell it easily or you may have to sell it at a price that will significantly affect the amount you will receive in return. The Sub-Fund does not include any return or capital guarantee against the vagaries of the market. You could lose all or part of the capital invested.

* Please refer to the Prospectus of the Sub-Fund for the details of the risks associated to this Sub-Fund.

The Management Company

Olympia Capital Management SA ("OCM") is a French investment management firm, authorized and regulated by the AMF and based in Paris. Founded in 1989, OCM is specialized in asset management and offers a full range of funds, customized solutions and advisory services to institutional and private investors.

MONTHLY REPORTING as of August 31, 2023

GEMS OLYMPIA UCITS FUND - Fixed Income Flexible Strategy

Monthly investment commentary

The Fixed Income Flexible Strategy ("FIS") sub-fund of the Gems Olympia UCITS Fund gained 0,17% in August 2023.

Market volatility increased in August after Fitch downgraded the US government credit rating from AAA to AA+. The downgrade, along with stronger-than-expected economic data and a still hawkish Federal Reserve, contributed to lifting US Treasury yields. Speaking at the Jackson Hole Summit, Fed Chair Jerome Powell articulated a 'higher for longer' rhetoric and did not rule out further rate hikes as core inflation remains elevated.

The US 10-year yield rose from 3.95 to 4.1% in August, after climbing as high as 4.33% during the month, the highest level in 16 years. The iShares Core U.S. Aggregate Bond ETF (AGG) was down 0.63% in August.

FIS avoided the month's volatile ride and locked a positive return after its model factors switched most of the exposure to money market funds.

US high yield (HY) had another volatile month, dropping as much as 1.5% before paring losses to advance 0.2%. Emerging markets bonds (EM) declined 1.9% for the month. Preferred bonds were down 0.3% and US convertible bonds dropped 2.8%.

FIS will enter September invested in HY and money markets funds, maintaining a low portfolio duration.
